- Process and resolve at-your-service (AYS) investigations on customer's inquiry and complaints related to usages, rating, and alerting.
- Develop, and maintain Verizon Internal dashboard application called Manga Macrotrend and automate macrotrend analysis using AI agent tools.
- Draft technical design and procedural documents for JITR Operations.

FULL-STACK DEVELOPER- VZ SUPPLIER

May 2022 - June 2023

- Develop and deliver domain-based, state-of-the-art IT-critical provisioning system (MTAS) with AWS cloud platform using various programming languages, and software design patterns.
- Develop and deliver production parallel and production parallel like testing tools.
- Assist in the project planning tasks, manage middleware application configurations and development resources, and collaborate with diverse engineering professionals.
- Collaborate and lead a team on various software testing activities such as sanity testing, integration testing, non-production and production parallel testing, and comparewise testing.
- Monitor and report device's network-elements during production enablement and smoke testing.
- Draft technical design and procedural documents. Collaborate on code design reviews.
- Participate in rapid development using scrum methodology, and assist in continuous improvement in project's processes.
- Assist on code defects analysis and code review meetings.

HCL Americas Inc.

Frisco, TX

SR. DEVELOPER

February 2022 - Present

- Provide support in specialize technology areas such as requirements/specifications definition, analysis, assessment, planning, design, development, integration, testing, installation, performance tuning, deployment and/or maintenance.
- Design, develop, test, deploy, maintain and improve software.
- Manage individual project priorities, deadlines and deliverables.
- Write design documents and participate in design reviews.
- Collaborate with experience teams to improve develop tooling.
- Optimize develop systems for performance and reliability.
- Provide solution-based on technical documents and business requirements.
- Develop functions, scripts, store procedures and triggers to support application development.
- Ensure data integrity and quality.
- Use applicable methodologies, modeling/estimating techniques, tools, applications, systems, software and/or databases to perform assign tasks.
- Comply with the standard and organization requirements relative to specific assignments.

Skills

Technical Skills:

SQL, Java, C/C++, Python, Posix shell, HTML, XML, Git, Unit Testing, Integration Testing, Production Parallel Testing, Performance Testing, JavaScript, JSON .

Software Tools:

GitHub Copilot, Microsoft Gemini, Claude AI agents, Cassandra dbeaver, TeraData, IBM Data Studio 4.1.3, Junit, JPA, Slack, MySQL Workbench, MySQL Developer, Bootstrap framework, Spring framework (STS), Spring Boot, Kibana with ELK stack, Splunk, Kubernetes, Postman, Atlassian Jira, Atlassian Confluence, Eclipse IDE, Netbeans IDE, IntelliJ IDE, Visual Studio Code, Docker, Git Desktop, GitHub, Gitlab, Putty, SuperPutty, Notepad++, Unix Shell, Windows CMD, Powershell, and Bash .

Soft Skills:

Communication skills, problem solving skills, teamwork capability, self-management, time management, cultural awareness, empathy, Integrity/Honesty, Waterfall, Agile, Spiral, Scrum, RAPID, TDD, BDD, and project managment.

Education

University of Texas at Arlington

Arlington, TX.

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING

December 2021

- GPA: 3.101

University of Texas at Arlington

Arlington, TX.

BACHELOR OF SCIENCE IN CHEMISTRY

May 2013

- GPA: 3.101
- Contributor to a academic journal: Solid-phase N-terminal peptide enrichment study by optimizing trypsin proteolysis on homoarginine-modified proteins by mass spectrometry.
